Featured Product emerginC Eye Serum

This lightweight vitamin C eye serum is designed to target fine lines and crow's feet around the eyes. The ingredients will not only help lift and tighten the skin around the eye but the vitamin C will help to reduce the appearance of dark circles.

Tips and Tricks - How can I winterize my makeup?

- Instead of using bronzer, stick with blush. Bronzer may look too orange in the winter since our complexions tend to be paler. Choose a powder or cream blush with nectar, bright rose, or gold-flecked peach tones; all work well on most complexions.
- Use moisturizing lipstick instead of lip gloss in the winter months. A bright plum or berry shade will help to brighten your face in the winter and the blue undertones will make your teeth appear whiter!
- Switching to a cream based eye shadow instead of powder will help to keep your eyes nice and moisturized. For a smoky effect try a silver or icy blue tone with a shade of gunmetal in the crease.
- Make over your skin care routine! Come in for a free skin analysis and product consultation. Our esthetician will go through your current skin care products with you and help to re-vamp your routine, recommending products that will help your skin to look its best!

Meet the Doctor

Sidney Rabinowitz, MD is board-certified in general surgery, plastic surgery, micro surgery and hand surgery. Dr. Rabinowitz completed his undergraduate education at Washington University in St. Louis before attending medical school at New York University School of Medicine. After earning his degree in 1987, he went on to complete more than nine years of medical training. He has always been considered a warm, personable man by his peers and patients alike. He specializes in breast enhancement, body contouring, facial enhancement and rejuvenation. You can visit his website www.njcosmetic.com to review examples of his past surgical procedures or schedule a consultation.

What's New

The FDA has approved the use of silicone gel-filled breast implants

The cohesive gel looks and feels more natural. To read more about these implants visit www.Natrelle.com. There are a few techniques your surgeon can use to insert the implant. Implants vary in size, profile and the shell surface; it may be smooth or textured. These are all options you will discuss with your surgeon in order to pick the implant that will give you the best result. Call today to schedule a consultation with Dr. Rabinowitz.

What's New

The Jessner Peel

NJ Cosmetic sent their esthetician Kristen Maresca to San Francisco in January. While there she was trained to performing the *Jessner Peel*, which specifically targets fine lines, wrinkles, hyper-pigmentation, acne, and many other skin conditions. Call for your free consultation!

We hope that you found our newsletter informative. Please don't forget to register early for The Night of Beauty to receive your free gift.

Sincerely,

Natalie Guggino, Office Manager
Kristen Maresca, Esthetician
